Perfect. Thanks! I was looking at the watershed characterization the other day and noticed that it's outdated. Dean has the Lower Gally as completed in the recent project development spreadsheet he sent out. Have you updated or had Eric Sivers update it? If not we should bring it up at our next project meeting. Speaking of that, would you be okay with moving the meeting to a different time? Particularly when we have our sed team meetings, it's tough for me to avoid driving back and forth across town a bunch. I'm going to ask Dean but wanted to check with you first. Next week's time should be fine though because I need to spend some time at DEQ looking through the assessment files for the sed listed streams.
